

Clinic Contraception Stock

Need assistance navigating which contraceptive methods to choose from based on insurance?

Here is a list of ways to stock contraceptive methods in your clinic and tips for billing.

XPEDOSE™

Stellar Pharmacy: XpeDose unit

This unit houses contraceptive methods to be used on New Mexico Medicaid patients ONLY. (Is considered a Specialty Pharmacy)

- Xpedose unit bills MCO for J code/ device used
- Clinic does not bill J code
- Clinic bills for encounter/procedure

LARC Mentoring Program devices

These contraceptive methods are purchased with the stipend provided by UNM's LARC Mentoring Program.

- Devices are for uninsured or people seeking confidentiality (who may or may not have insurance)
- Clinic does not bill for J code nor the encounter/procedures

Other Stock/ Private Insurance

Your clinic may or may not have other contraceptive methods in stock. Please ask and clarify with clinic/nurse manager.

- Patients may have "pharmacy benefit" through private insurance
 - Device is ordered specifically for that patient and delivered to your clinic (J code has been submitted prior to delivery)
- Clinic bills for encounter/procedure

We understand that questions or concerns may arise. Please reach out to any contacts listed below.

Together, we can overcome anything!

We know that it may be challenging to adapt to the different stocking methods related to LARC. However, we are here to help! Don't hesitate to reach out or to ask us any questions.
