

What Resource Coordination Looks Like at El Pueblo's Spartan School-Based Health Center

How students enter resource coordination (screening, referral, etc.)

- Warm handoffs and/or EHR referral from SBHC Providers/Staff
- Referred by School Staff
- Student Walk-in
- Resource Coordinator Open Office Hours
- Parent referral
- All Welcome

What happens next at a high level (care plans, follow-up, etc.)

- Parent +/- Student Consent
- Health/SDOH Screening
- Develop/Execute Care Plan
- Parent Engagement
- Follow-up
- Network/Resource Access Development ongoing

What this looks like in a typical week or day

- SBHC team daily huddles
- School staff/teachers rounding
- School Engagement (meetings, groups, leadership)
- Outreach with Community Organizations (events)

A Unique Aspect to Our Model

Unique aspect

- Minority-majority school with under-resourced school staff wearing many "hats"
- Successes are through 1:1 relationships- consistent rounding vs scheduled meetings more effective
- Having a Resource Coordinator & showing up

(3) What's On the Horizon

Over the summer & next school year, we are focused on improving parent engagement and awareness of our SBHC and available resources because this is a significant barrier in our school for both health and education outcomes success.
